Aspiring AIML Engineer

Technically driven AI & ML specialist focused on designing and developing practical, end-to-end solutions, with a strong ability to translate machine learning concepts into real-world applications through effective problem-solving and system design.

EDUCATION

B.Tech(Computer Science & Engineering – AI & ML)
Manav Rachna University | Pursuing
CGPA: 8.3/10

Class 12th CBSE
St.Georges School| May 2023
Percentage : 81%

Class 10th CBSE
St.Georges School| May 2021
Percentage : 94.6%

INTERNSHIPS

UI/UX Developer Tech EnsureX, Faridabad |
June 2025 – August 2025
- Contributed to website UI design and front-end layout improvements and helped them get better engaments on social media.
- Gained hands-on experience in UI design, user outreach for product testing, and managing social media communication.

TRAININGS & CERTIFICATIONS

- The Front End Web Developer Bootcamp – Udemy
- Data Analytics job simulation – Forage , Deloitte
- Machine Learning Professional – Rapidminer
- Deep Learning: Getting Started – Linkedin Learning

AWARDS & ACHIEVEMENTS

- Gold Medal Certificate – NPTEL "Design Thinking and Innovation"
-Chairperson RAS(Robotics and Automation Society), IEEE MRU
- Social media manager for two university societies
- Built multiple ML projects independently and in teams

SKILLS

Technical: Python, C++, HTML , CSS, JavaScript , Figma, Photoshop, Premiere Pro, Canva, React, Flask, Flutter, SQL
Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, KMeans, PCA
Deep Learning: CNNs, RNNs, GRU, Vision Transformers (ViT)
Tools: TensorFlow, Keras, PyTorch, Pandas, NumPy, scikit-learn , Excel
Other Tools: Jupyter Notebook, Anaconda, Streamlit, GitHub, VS Code

PROJECTS / RESEARCH

Fintech Platform for MSMEs (Work in Progress):
-> ML-based credit risk assessment using Logistic Regression, Decision Trees, Random Forest & SVM on features like credit history, EMI load, and repayment patterns
-> Expanding pipeline with KYC, GST, banking & bureau-derived risk indicators

Energy Consumption Prediction(CNN-LSTM):
->Hybrid CNN-LSTM model for Delhi's electricity load forecasting using weather & historical demand data.
-> Model demonstrated strong predictive performance with minimal forecasting deviation

KAVACH Cybersecurity App (in progress):
-> Detects phishing links, deepfakes & malicious URLs with real-time threat categorization.
-> AI-driven automated reporting for fast cyber incident response.

LANGUAGES

English (Fluent) , Hindi (Fluent) , French (Basic) , Sindhi(Fluent)

HOBBIES & INTERESTS

Cooking, Content Creation, Photography, Cinematography, Cricket, Video Games
